### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicants arguments make clear that the newly added claim language of "wherein said dynamically changing; the power consumption comprises executing instructions in said computer processor while changing voltage at which said computer processor is operated" makes clear that the clock is not stopped. The applicants newly cited reference (Intel 83801) makes clear that in the prior art to stop the clock of the processor just prior to changing the voltage in accordance with the program running on the processor was a common method of changing power consumption by changing voltage. Thus examiner cannot state that because the Horden et al reference teaches changing power consumption under software control inherently means that the processor is executing instructions in said computer processor while changing voltage. The examiner was unable to find a reference that expressly stated executing instructions in said computer processor while changing voltage meaning the clock is not stopped.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul R. Myers whose telephone number is 703 305 9656. The examiner can normally be reached on Mon-Thur 6:30-4:00.
